Claims 1 to 5

The inventions set forth in claims 1 to 5 do not involve an inventive step in the light of document 1 and documents 3 to 5, or document 2 and documents 3 to 5.

Document 1 (fig. 2 and 5) and document 2 (fig. 16) cited in the international search report disclose the feature of recording a file that comprises a plurality of viewpoints.

In addition, newly cited document 4 (paragraphs [0036] to [0038] and fig. 4) discloses the feature of synthesizing a single image from a left image and a right image that are disposed in parallel, and then configuring

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

a single file from the single image in question, while newly cited document 5 (paragraphs [0052] and [0053]) discloses the feature of appending a file extension to a file name in order to make it clear that the file is an image file which comprises three-dimensional image data that has been synthesized in stripes; therefore, it would have been easy for a person skilled in the art to conceive of applying the technical features in question to the invention that is disclosed in document 1 or document 2.

Claim 6

The invention set forth in claim 6 does not involve an inventive step in the light of document 1 and documents 3 to 4, or document 2 and documents 3 to 4.

Document 3 (fig. 2) cited in the international search report discloses the feature of employing three-dimensional image control information, and document 4 (paragraphs [0036] to [0038] and fig. 4) discloses the feature of synthesizing a single image from a left image and a right image that are disposed in parallel, and then configuring a single file from the single image in question; therefore, it would have been easy for a person skilled in the art to conceive of applying the technical features in question to the invention that is disclosed in document 1 or document 2.

Claim 7

The invention set forth in claim 7 does not involve an inventive step in the light of document 1 and documents 3 to 5.

Document 3 (fig. 2) discloses the feature of
